

Zakwan Mansuri

AI TECHNOLOGY & BUSINESS CONSULTANT

AI Automation | RAG & Agentic Systems | Project Delivery | Digital Growth

Ahmedabad, India | +91 97121 21230 | mansurizak@gmail.com | zakwanai.github.io | linkedin.com/in/zakwanai

PROFESSIONAL PROFILE

Business-oriented AI Technology and Automation Consultant with 6+ years of experience winning, scoping, building and managing project-based work for clients across India, Australia, the United States and other global markets. Combines hands-on delivery in RAG, multi-agent systems, LLM automation, machine learning and data products with client discovery, project planning, resource coordination and digital growth. Delivered enterprise and SMB solutions from business problem definition through production deployment, including systems that reduced manual compliance review by 70%, accelerated analytics turnaround by 85%, and saved 25+ hours per week.

CORE EXPERTISE

TECHNOLOGY & AI	BUSINESS & GROWTH
AI Engineering: RAG, LangChain, LangGraph, CrewAI, LlamaIndex, fine-tuning, OpenAI, Claude, Gemini and Ollama	Business & Delivery: Client acquisition, discovery, scoping, planning, quality and delivery
Data & Automation: Python, SQL, scikit-learn, TensorFlow, PyTorch, XGBoost, forecasting, NLP and OCR	Digital Growth: Website, search/local visibility, content, AI video and lead strategy
Architecture & Search: FastAPI, Flask, PostgreSQL, MySQL, ChromaDB, Pinecone, FAISS, pgvector, Docker and AWS	Automation & BI: n8n, Zapier, Streamlit, Power BI, Tableau, CI/CD and distributed-team delivery

PROFESSIONAL EXPERIENCE

AI Technology & Business Operations Consultant | Freelance / Independent | Apr 2020 - Present

India & Global Remote

- Built a project-based consulting practice by identifying overseas opportunities across software, AI, data, automation, digital growth and selected business-growth assignments.
- Led requirement discovery and translated client objectives into practical scopes, work plans, responsibilities, timelines and expected deliverables.
- Identified and coordinated suitable India-based professionals; managed progress, issue resolution, quality review and final delivery across distributed assignments.
- Personally delivered technical development, analysis, testing, documentation, research, automation and digital-growth strategy where appropriate.
- Maintained repeat client relationships through clear communication, hands-on ownership and dependable delivery.

Digital Growth & Strategy Consultant | Sydney-Based Construction & Joinery Business | Jul 2026 - Present

Remote

- Work directly with the CEO to shape a practical digital growth strategy aligned with the company's priorities, requirements and delivery capacity.
- Support planning across website improvement, search and local visibility, Google Business Profile, social content, AI-assisted marketing videos, lead generation, analytics and workflow improvement.
- Translate priorities into manageable initiatives, recommendations and progressive implementation steps.

Family Business Operations | Laces & Ladies' Accessories | Ongoing

Ahmedabad, India

- Practical involvement in a 30+ year family business supported by a retail outlet and direct relationships with manufacturers and wholesalers.
- Built practical understanding of relationship-led business, retail and wholesale coordination, supplier networks, customer needs and day-to-day problem-solving; connected with a broader Gujarat network across textiles, chemicals, manufacturing and machinery.

SELECTED AI & AUTOMATION ENGAGEMENTS

Regulatory AI & Compliance Automation | LLM fine-tuning | Agentic workflows | PostgreSQL | vLLM

- Fine-tuned a 30B-parameter language model on regulatory and financial data to support AI-driven compliance checks across complex multi-tenant enterprise datasets.
- Engineered tool-calling reasoning loops for real-time retrieval, compliance flagging and structured audit reporting, reducing manual review time by 70%; deployed on private GPU infrastructure using vLLM, Llama.cpp, Ollama and LiteLLM.

Conversational ERP Analytics Agent | FastAPI | SSE | PostgreSQL JSONB | Agentic AI

- Built a production-grade conversational assistant with multi-turn memory, real-time streaming and per-user conversation history inside a financial ERP dashboard.
- Enabled C-suite and finance teams to query complex financial data in plain English while handling concurrent requests, reducing analyst turnaround time by 85%.

Automated Invoice & Document Processing | OCR | STT/TTS | MySQL | Python

- Designed a multimodal pipeline for invoice OCR, bank-statement parsing and IVR calling, mapping extracted data into enterprise databases and saving 25+ hours per week while reducing processing errors to near zero.

NL2SQL Executive Intelligence Engine | Multi-model LLM pipeline | ChromaDB | MySQL | FastAPI

- Enabled leadership to query a 200+ table production database in plain English through a cost-optimised model-routing pipeline using Gemini 1.5 Flash, Phi-3 Mini and Gemma 3.
- Built schema-aware semantic search with ChromaDB and MiniLM embeddings, reducing internal data-request turnaround by 90%.

Demand Forecasting & Resource Optimisation | XGBoost | Random Forest | Geospatial features

- Forecast peak-hour demand and regional supply shortages for a ride-sharing platform, improving resource allocation efficiency by 30%; deployed automated retraining pipelines.

Multi-Agent Financial Research System | CrewAI | LangChain | FastAPI | Streamlit

- Architected four specialised agents for research, analysis, sentiment and synthesis across ASX and global equities, with live data sources and model orchestration supporting 100+ providers.

Intelligent Recommendation & Matching Systems | NLP | Clustering | Semantic similarity

- Delivered talent-platform and e-commerce recommendation engines using semantic similarity, unsupervised clustering and content-based filtering, improving match accuracy by 20-30% on average.

MS/PhD Research Consulting | Statistical modelling | ML implementation | Python

- Delivered thesis-level analysis, statistical modelling and ML implementation for graduate researchers in India and internationally, building long-term relationships through consistent quality.

OPEN SOURCE & NOTABLE PROJECTS

AI-FAQs - Open Source FAQ Generation Tool | LLMs | RAG | Python

- Developed and open-sourced an LLM-powered tool that generates structured FAQs from business data and feeds them into RAG knowledge bases for in-product chatbots; solo developer and maintainer.

MCQ Generation System | LangChain LCEL | OpenAI | Gemini | Ollama

- Built a multi-provider MCQ generator for PDF and text inputs with UI-based model configuration, CSV export, and automated grammar and complexity evaluation.

EDUCATION

Bachelor of Engineering - Information Technology | Government Engineering College, Gandhinagar | 2013-2017 | CGPA: 7.08/10

Continuous learning: LangGraph, advanced agentic systems, GPU model serving (vLLM, Ollama), LlamaIndex, computer vision and production LLM infrastructure.

ADDITIONAL INFORMATION

Languages: English, Hindi and Gujarati; experienced in communicating with international clients and distributed teams.

Availability: Open to consulting, contract, remote and suitable global opportunities.

Engagement models: Hourly consulting, fixed-price projects, monthly retainers and long-term embedded consulting.

Community: Google Meetups, Data Science Bootcamps and AI community events in Ahmedabad; Microsoft Imagine Digital India Summit, Gandhinagar.

Working style: Self-directed, adaptable and outcome-focused, with clear client communication and hands-on execution from scoping through delivery.
